**ab-initio**

ab-initio is a Latin expression for "a new beginning" ab-initio tries to capture the joy and exhilaration of doing things for the first time. It acts as a platform for the students of SNIT to give voice to their thoughts, realise their talents, celebrate their skills & achievements.

S.N.D. Prasad, Managing Director
It is a matter of great joy and pride for me to be part of SNIT's first magazine "ab-initio". ab-initio which means "From the Beginning" is an apt title for SNIT's first editorial. ab-initio has tried to capture and represent the pride associated with starting of new events, new victories and new aspirations in SNIT.

The college magazine has given our students a platform to express their creativity, thoughts and imagination, it has also allowed them to celebrate and relive their victories and achievements during the past year.

I wish my students continue to progress in all the vistas of their life in SNIT, whether it be in the field of education or extra-curricular activities. I also wholeheartedly wish the ab-initio team all the very best for their work and hope the magazine is enjoyed by all.

Abyin Ampadiyil

Sree Narayana Institute of Technology
(PRINCIPAL)

SNT ADOOR established in 2011 is one of the few new engineering institutes which has planned well before starting and provided all the infrastructure, facilities as well as human resources well in advance, not only for the first year but all remaining years as well. Its main aim is to spread technical knowledge in various developed areas also. The chairman and the board of directors are striving very hard to develop this institute into an institute of excellence in which I do not have any doubt.

At this juncture after 2 years of starting it is quite exhilarating to know that SNT is trying to living out a magazine narrating all the activities. I congratulate the management as well as the magazine committee and wish them all the success.

Dr. SUNEETH KUMAR S M

- Varsha Susan Thomas (53 CIVEL)

Everything has a beginning. The world has a beginning. Every invention has a beginning, and they are the ideas. A fruit is the final result of a beginning, i.e., "the growth of a seed." Big Bang theory and Biochemical evolution are some theories explaining the beginning of world.

"ab-initio" from the beginning,

We are in the beginning of an era, It’s the time for egg to be hatched and chicken to breathe the air of creativity. It is the time for butterfly to leave the leaf and spread its beauty to the nature. It’s the time for a plant to show its beauty through flowers,

Aryabhatta was the beginning of great successes of our country in the world of space researches. Everything and everyone has a beginning. SNF Advisor is now in the beginning of an era. This institution has been a vantage providing us with new insights into the profession, opening up the distant horizon of knowledge, providing stimulus to elicit our unborn potential.

Now we are in the open world, “ab-initio 2012” is the beginning, it’s the new born child to be grown up and reach the peak of excellence. “ab-initio 2012” is the result of hard work and dedication, it is the innovation, creativity, and it is also the newbie to the professional society.

Here I dedicate all my efforts to the one who has been with me in all my adversities... who made me taste the essence of the word ‘understanding’.
